### Compliance

Helping organisations to stay compliant with regulations and standards in their industry, such as PCI DSS, CSA STAR, GDPR, ISO, FedRAMP, ISF, NIST, CIS, SWIFT and many others.

### Governance

Assisting organisations to establish effective governance structures and processes, including policies, procedures and controls to ensure accountability, transparency and ethical behavior.

### Risk Management

Helping organisations to identify, assess, and prioritize risks to their business operations, develop strategies and plans to mitigate these risks.

### Security Architecture

Assisting organisations to design and implement a security architecture that aligns with an organisation's business objectives, IT infrastructure and compliance frameworks.

### Audits

Providing internal and external audit services to help organisations evaluate their internal controls and processes, identify areas for improvement and mitigate risks.

### Third-Party Assurance

Helping organisations manage the risks associated with third-party relationships, including vendors, cloud providers, suppliers and business partners.
